

Salcom "Waiter Page" Hospitality System

Comprising a SALCOM 11-85-000 eight button transmitter and up to eight pagers, this Waiter page system provides an ideal solution for food outlets requiring communications with kitchen and waiter staff for service delivery.

Free up staff and allow them to pay more attention to the needs of your guests by summoning them to the kitchen for meal deliveries or the bar for refreshment deliveries only when required.

Waiter staff are summoned by a silent vibrator alert on their pager eliminating the need for alternative methods such as overhead paging, light boards or kitchen bells.

Diners benefit by always receiving meals while they are hot without the annoyance of unnecessary distractions which may be created by alternative communication methods.

The Waiter Page System can provide your establishment with improved staff efficiencies and your customers with an enhanced dining experience.

- No installation required
- Transmitter caters for up to eight pagers
- Reliable, rugged, stylish pagers
- Pagers alert when battery replacement is required
- User replaceable pager batteries
- Waiters only return to kitchen or bar on demand and can be more attentive to customer needs
- Diners always receive meals while they are hot
- Customer experience enhanced by the elimination of disturbance from overhead paging or kitchen bells

**TRANSMITTER
