

Salcom has further developed its range of rack systems in order to provide off-the-shelf 1U x 19 inch transmitter for paging and telemetry, including Simulcast and Store & Forward applications. These units provide a conveniently packaged selection of standard Salcom core products that can easily be added to your server rack. Select between transmitter or "Store & Forward" models.

Salcom Rack Systems - VHF & UHF

12-49-0150 VHF Transmitter, 4W / 5W

12-49-5450 UHF Store & Forward Repeater, 25W

See over for full table of model options available:

Applications:

- **Messaging:** The 12-62 supports pager messaging and can transmit 3 types of POCSAG message; alphanumeric, numeric & tone only transmissions.
- **Simulcast Modulation Delay:** Allows the user to configure the transmission delay for modulated data. The delay can be configured to be between $10\mu\text{S}$ & $2550\mu\text{S}$
- **Store & Forward:** Used when a transmitter is designated as a source, and a receiver listens to the source relaying the message to another transmitter for retransmission. Configurable as an optional feature.
- **Telemetry Control:** Systems that need external messaging and data to operate, switch on/off.
- **Fire Panel Messaging.** Event and status reporting
